

PRODUCT WALKTHROUGH - 2026-08-03

PaisaPath

A financial mentor for first-time earners in India. Every rupee on screen is computed locally and can be re-derived; the AI engine only ever explains those numbers in plain language.

5 screens, captured at 1440 px wide at 2x density

Decision support - Automation & planning - Trust & financial education

Section 1 of 4: About you. Name, date of birth, city, stage, dependants

STEP 1 OF 6 · ABOUT YOU

0/22 answered

About you

Five quick things so the advice is about you, not an average.

1

What should we call you?

First name is fine

2

Date of birth

Age sets your investing horizon — it is the one input you cannot change and the most powerful one you have.

dd/mm/yyyy

3

Which city do you live in?

Bengaluru, Pune, Kochi...

4

What best describes you right now?

Studying — allowance or stipend

First job, under two years in

Working, more than two years in

Freelancing or self-employed

5

Does anyone depend on your income?

This changes how large a buffer you need, and how much risk is reasonable.

No one but me

I contribute at home, but I am not the main earner

People rely on me

Not now

STEP 4 OF 6 · WHAT YOU ALREADY KNOW

21/22 answered

What you already know

Six questions with real answers. "Not sure" costs you nothing and tells us what to explain.

1

₹10,000 grows at 8% a year, compounded. Roughly what is it worth after two years?

About ₹11,600

About ₹11,664

About ₹10,800

Not sure

2

Inflation runs at 6% and your savings account pays 3.5%. Over a year, your money...

Grows — it earned interest

Buys less than it did before

Is worth exactly the same

Not sure

3

What does an index fund actually do?

A manager picks the shares they expect to win

It holds a whole market in proportion, at low cost

It guarantees a fixed return each year

Not sure

4

You pay only the "minimum amount due" on your credit card. What happens?

Nothing — the account is current, no interest

The rest carries interest, typically 36–42% a year

A flat late fee, and that is all

Not sure

5

Which is true of a term insurance policy?

It returns your premiums at the end

It pays out only on death, and is the cheapest way to buy cover

It works as an investment as well as cover

Not sure

6

Where should an emergency fund actually sit?

In equity mutual funds, so it grows

A separate savings account or liquid fund

A five-year fixed deposit at the best rate

Not sure
